TO PATRONS

1. This Condensed Catalog and Price List cancels all previous prices, either in special lists, offers, or catalogs.

ORDERS.

2. Order early so that you may get the grades and varieties you prefer. All orders should be legibly written on a separate sheet, and not mixed up in the body of a letter, which will save us a great deal of trouble, and tend to prevent mistakes. You will find an order sheet in our Catalog which will help you. Please use it.

SUBSTITUTIONS.

3. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated, whether, and to what extent, substitution will be allowed, in case the order cannot be filled to the letter. Where no instructions are given, we will cancel that part of the order we are unable to fill.

PACKING.

4. All trees and plants are carefully labeled and securely packed in best manner, and delivered at the railroad station at Milton, Oregon, free of charge.

EXPRESS OF FREIGHT.

5. Always state which way you want your orders shipped, and give explicit directions for marking packages. When it is left to us to choose the mode of conveyance, we will exercise our best judgment, considering the season and weather conditions. We will use every precaution and means to prevent delay in transit.

GUARANTEE, ETC.

6. We warrant all trees and plants to be good, thrifty, and true to label, but having no control over them after delivery to the transportation companies, or over the planting and care after they are received by the buyer, we will not be responsible in any other measure than as stated, and therefore if any tree or plant should prove untrue to kind we will either replace the same or refund the money paid for it; but in no case will be liable for any sum greater than that originally paid, and this statement is due notice to buyers of the extent of our responsibility for plants and trees, after delivery of same shall have been accepted by the buyer.

REPLACING.

7. For the reason that we have no control over the planting, pruning and care of the trees after they leave our hands, we will not bind ourselves to replace any trees that may die. However, all complaints of our customers are given just consideration.

TERMS.

8. Cash must accompany all orders. Orders may be sent C. O. D. when accompanied by half cash, otherwise we cannot accept them.

9. You may send us a check, bank draft, express or post office money order, or cash by registered letter.

TIME OF SHIPMENT.

10. We usually begin shipping soon after October 1st, in Fall and continuing throughout the winter as the weather permits, and about the 1st of March in spring, until about the middle of April.

WRITE PLAINLY.

11. We wish to emphasize this point. Always be sure to write your name on your order, plainly, with post office, and freight or express point, so no mistakes may be made in shipping.

12. The new Parcels Post regulations make it possible for us to send safely, small mailing sizes of trees, shrubs and vines, to all points and is a very quick and satisfactory service. Address all communications to

Condensed Catalog and Price List

SEASON 1914

Fruit and Ornamental Trees, Evergreens,
Shrubs, Vines, Roses, Etc.

We present herewith our Condensed Catalog and Price List No. 2, for the coming season. Our nurseries are among the oldest and most complete on the Pacific Coast. Genuineness and Quality have been our strong points in building up our business during the past thirty-five years. We maintain on our grounds a cion orchard from which we cut our buds and cions, under our own supervision. When we are unable to supply all the varieties and quantities needed, we secure from known bearing orchards operated by men of integrity, so that we know our wood is genuine. The reputation our stock has for reliability and thriftiness is an index to the care and pains exercised to keep varieties true to name.

We invite the most careful inspection of our nursery stock by any and all persons.

HINTS ON PLANTING, ETC.

WHAT TO PLANT—Select thrifty young trees in preference to old or very large ones; the roots are more tender and fibrous and bear transplanting better and are far more apt to live. They can also be more easily trimmed and shaped to any desired form, and in the course of a few years will usually outstrip the old ones in growth. The largest and most successful planters almost invariably select one-year-old trees.

TREATMENT—When the trees are received from the nursery, bury the roots in well pulverized soil until you are ready to plant them. Never expose the roots to sun or wind. If trees are received in a frozen state, place the package unopened in a cellar, away from frost and heat, until thawed out, then unpack. If partly dried from long exposure, bury entirely in the ground, or place in water from twelve to twenty-four hours.

PLANTING—Make the holes large enough to admit the roots without cramping or bending, and deep enough to bring the tree to its natural depth. The fine surface soil should be used in covering the roots, and this should be carefully worked among them. If the ground is dry it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots, so there will be no opportunity for dry air or frost to enter and destroy roots deprived of the full benefit of their natural protection. Omission to pack the earth solidly is a more frequent cause of failure in planting nursery stock than any other. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Large standard trees should be staked and tied so that the wind will not loosen the roots. Be sure to cut the tops back fully one-third soon after planting,

AFTER CULTURE—Cultivate vegetables among your trees, never grain or grass. In order to make your trees have a good healthy growth you must cultivate them the same as you would corn or potatoes; in fact you cannot cultivate them too much the first three years.

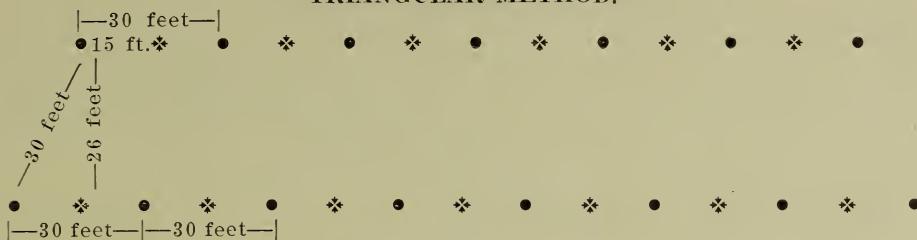

PRUNING—Pruning should be varied according to the condition of the tree and the purpose of the planter. It should be done regularly every Spring before the buds swell, and thus avoid removal of large branches.

SHADE TREES—If large, should be cut back liberally when planted and well staked until they become firmly established. After pruning will seldom be necessary as they are to provide shade and will form natural heads.

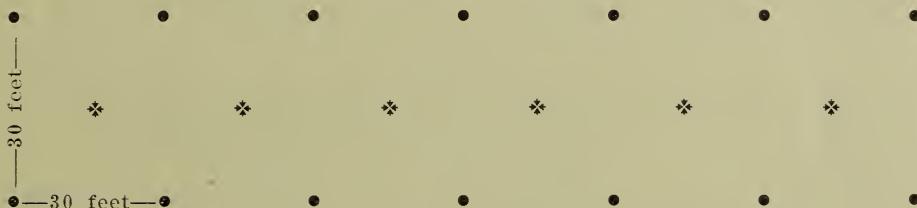

NUMBER OF TREES OR PLANTS ON AN ACRE AT GIVEN DISTANCES

Distance, 1 foot apart each way, No. Plants	43,560	50,300
" 2 "	10,890	12,575
" 3 "	4,840	5,899
" 4 "	2,722	3,143
" 5 "	1,742	2,011
" 6 "	1,210	1,397
" 7 "	888	1,035
" 8 "	680	785
" 9 "	537	620
" 10 "	435	502

TRIANGULAR METHOD.

SQUARE METHOD.

• indicates permanent trees; * indicates fillers.

Rule, or Square Method—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule, Equilateral Triangle Method—Divide the number required to the acre, "square method," by the decimal .866. The result will be the number of plants required to the acre by this method.

DISTANCES FOR PLANTING.

Standard Apple	25 to 30 feet apart each way
Standard Pears	20 to 25 " "
Strong Growing Cherries	20 to 25 " "
Duke and Morello Cherries	16 to 18 " "
Standard Plums and Prunes	16 to 18 " "
Apricots, Peaches and Nectarines	16 to 18 " "
Grapes	7 to 10 " "
Currants and Gooseberries	4 to 6
Raspberries and Blackberries	3 to 4 by 5 to 7
Strawberries for field culture	1 to 1½ by 4 to 4
Strawberries for garden culture	1 to 2 feet apart

Careful attention should be given to spraying both as a preventive and a curative measure. When signs of disease or attack by insects are first seen a remedy should be sought and carefully applied. Timely applications of a suitable spray may save a large expenditure later, even the tree itself or perhaps the whole orchard. Consult the State Agricultural College Bulletins on this subject. A spray Calendar will be found in the back of this Catalog.

All communications relative to nursery stock and prices will be attended to promptly, and any information or advice that we are able to impart, when desired, will be given freely.

Address,

MILTON NURSERY COMPANY,

Milton, Oregon.

Spokane Beauty, largest apple grown
Early Goodwin, Eismarck, early bearer Palouse
Lady Apple

Early Goodwin—Originated one and one-half miles north of our nurseries, on the old fruit farm of William Goodwin, whose name we have given this valuable apple, not only in honor of him, but that it expresses in part, the quality of the fruit, "Good one." Upright, spreading, vigorous growth, perfectly hardy, and a heavy, annual bearer. Fruit large, smooth, roundish, oblong, beautifully colored whitish yellow, striped and splashed with bright red, covered with thin bloom. Flesh white, tender, juicy, sub-acid, excellent cooker, dessert. July and August. Long keeper and good shipper.

Spokane Beauty—Largest apple known. A perfect prodigy for beauty and large size. Color greenish yellow shaded and striped with deep red; flesh crisp, juicy, and rich, with delicious high flavor; unsurpassed for cooking and drying; a long keeper. Awarded first prize Spokane Fruit Fair 1895-1896.

Bing	Lambert	Royal Ann
------	---------	-----------

Bing—New black cherry. Originated by Seth Luelling, of Milwaukie, Ore. Almost as large again as the Black Republican. Flesh very solid, flavor of highest quality; tree thrifty, upright grower, very hardy and productive. A fine shipper. First of July.

Lambert—Size very large, roundish, heart shaped. Cavity medium regular with gradual slope. Stem long, slender. Suture of medium depth, wide, extending from cavity to apex, which is of a round russet dot in broad depression; surface smooth, glossy; color dark purplish red with numerous minute indented russet dots. Flesh dark purplish red with whitish veins, meaty and of firm texture; semi-cling, small seed for so large a fruit. Flavor sweet or very mild sub-acid, aromatic, rich. Quality very good and an excellent shipper.

1 year old	4 to 6 feet	.40	\$4.00	\$30.00
Abundance	Burbank	Prunus Simoni		
Formosa		\$1.00	\$10.00	

Formosa—Unusually handsome fruit of uniform size, about six by eight inches in circumference, shading from light to deep cherry in color, sweet, delicious, delightful apricot flavor; nearly freestone. Tree thrifty grower, large, thick, light green, healthy foliage. One of the most valuable of Luther Burbank's productions and pronounced as "the best plum in existence" at present time.

PRUNES—

Early Crawford						

PEACHES—New, choice sorts.

1 year old	4 to 6 feet	.30	\$3.00	\$22.00
Triumph	Champion	Perfection		

Perfection—This new and valuable peach originated about three miles above Weston, Umatilla County, Oregon, near the timber line of the Blue Mountains, which proves its hardiness. The fruit is of the largest size, yellow, with beautiful blush cheek. The flesh is thick, very fine grained, yellow, with red around the pit, which is nearly as small as a prune seed. Its tough skin, firm flesh and good keeping qualities place it in the lead for a desirable shipping and market variety. Ripens from September 10 to 15.

PEACHES—Special.

			Each	Dozen	100
1 year old	4 to 6 feet	Arp Beauty	.50	\$5.00	\$35.00

Arp Beauty—Of Texas origin. Elberta type, but hardier in tree, bud and bloom, and very prolific. Skin and flesh yellow. Firm, juicy, excellent flavor. Ripens just as Alexander is going out. Good shipper. Sometimes freestone when ripe. Tested and a very satisfactory early variety.

NECTARINES—

APRICOTS—Special Sort.

			Each	Dozen	100
1 year old	4 to 6 feet	Tilton	.50	\$5.00	\$35.00

Tilton—Originated near Hanford, Kings County, California. Fruit large size, bright apricot color with a flavor of the highest quality. As a result of its fruit buds putting out much later than other varieties it is said to bear immense crops every year, and is considered the most prolific of all apricots, either for canning or drying.

QUINCES—

Campbell's Early30	3.00	20.00	

Moore's Early (American) Agawam (American) Flame Tokay (European)

Campbell's Early—Strong grower, with large, healthy foliage; productive. Its keeping and shipping qualities are equalled by no other grape. Ripens with Moore's Early. Bunch and berry large, glossy, black with blue bloom; sweet and juicy; seeds few and small, part readily from pulp. Stands at the head of early black grapes for quality.

BLACKBERRIES—

	Each	Dozen	100	1,000
Wilson	\$1.00	\$ 6.00	\$ 50.00	
Lawton	1.00	6.00	50.00	
Erie	1.00	6.00	50.00	
Mersereau (best to plant)	1.25	7.00	65.00	
Evergreen15	1.50		
Mammoth25	2.50		

Mersereau—This early, mammoth, ironclad, blackberry is by far the most valuable variety that has appeared since the advent of the Wilson, over thirty years ago. It originated in Northwestern New York, where the mercury falls from fifteen to twenty-five degrees below zero, and where it has stood in open field culture for many years without the slightest protection, never being injured in the least. In quality it is exceptionally sweet, melting, and luscious, being without core. The seedy character of the Snyder and most other sorts is noticeably absent. As a shipper and keeper it is unsurpassed, remaining firm without "bleeding" in handling.

RASPBERRIES—

	Each	Dozen	100	1,000
Cumberland, Black Cap	\$1.25	\$ 7.00	\$ 65.00	
Gregg, Black Cap	1.00	5.00	45.00	
Golden Queen, yellow	1.25	7.00		

	Each	Dozen	100	1,000
Cuthbert, red		1.00	5.00	45.00
Loudon, red		1.25	7.00	65.00
St. Regis,		2.00	10.00	

St. Regis—It is the first and last red raspberry to give ripe fruit. Earliest of all red raspberries, wonderfully prolific, giving crop of fruit all summer and autumn, fruiting on old canes in generous quantities until late in Fall. By this time berries begin to ripen on new canes, i. e. current year's canes, and will continue to produce berries in increasing numbers until severe frost. Berries bright crimson, large size and excellent quality, rich, sugary, with full raspberry flavor, of firm texture, good keeper and shipper. Canes stocky, with dark green leathery foliage. Succeeds well on all soils, and canes are absolutely hardy.

BLACKBERRY-RASPBERRY HYBRIDS—

Good strong, 1 year, nursery grown, and not the small tips usually sent out.

	Each	Dozen	100	1,000
Logan Berry25	\$ 2.50	\$15.00	
Phenomenal25	2.50	15.00	

DEWBERRY—

	Each	Dozen	100	1,000
Lucretia	\$1.25	\$ 7.00	\$ 65.00
